Professional Summary

Product Manager and AI Product builder with 4 years of experience building 0 to 1 in Consumer Apps, SaaS, workflow automation and AI driven products reaching over 10M+ users and improving business processes. Experience in owning full product lifecycle - from discovery and PRDs to GTM, analytics, and post-launch iteration. Thrives at the intersection of data, user insight, and cross-functional execution to deliver business value.

Experience

Associate Product Manager|*Network18 Media & Investments Limited* June 2024 – Present

- Owned and shipped 4 cross-functional products (AI, SaaS, consumer apps) from 0→1, impacting 10M+ users and driving measurable efficiency gains across the organization
- Led product strategy, roadmap, and execution, partnering with engineering, design, and business teams to deliver high-impact outcomes
- Conducted user interviews, used data, user insights, and rapid experimentation to guide prioritization and improve product performance
- Worked on GTM planning and product launches by aligning cross-functional teams, defining rollout strategies, and supporting user adoption initiatives
- Built and scaled One18, as AI powered News Aggregator powering all products of Network18 and with a user base of 10M+ users
- Launched a self-serve AdTech platform resulted in 450+ leads and unlocking a new inbound revenue channel
- Built workflow automation and CRM tooling improving sales visibility, operational efficiency, and revenue tracking across teams, contributing to an 8% increase in sales revenue.

Product Analyst | *Jetsynthesys Pvt Ltd* Aug 2022 – June 2024

- Led the launch of Wakau Dialer, achieving 1M+ downloads through cross-functional collaboration across product, engineering, design, and marketing.
- Supported product decisions and feature prioritization using market research, competitor analysis, and user behavior insights
- Tracked engagement and performance via Google Analytics and MoEngage to drive continuous product improvements

Additional Experience

First Employee | *Poketly*

- Built and launched Personal Financial Tracker app as a solo builder using AI tools like Codex, owning full product life cycle from ideation and UX to development, launch, user acquisition, reaching 1000+ users organically
